Cc: Daniel Nester; Steve Zuber-SIOR CCIM; egstegin Stegin; Martin, Thomas; Stone, Randall (ENRD) (Randall.Stone@usdoj.gov); Tom Binz; 'Cahnovsky, Chris'; 'Rednour, Erin' (Erin.Rednour@Illinois.gov)
Subject: Approval of CMAC

All

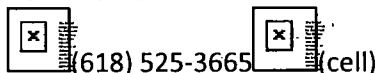

The sale of these material is pursuant to the previously approved UMBM work plan which has been incorporated into the Consent Decree. Subject to your submitted agreement with California Metals and Alloys Corporation (CMAC) this approval is for product that shall mean 'Mixed Copper Tin Material' with concentration levels of approximately Cu 8% and Sn 4% (a.k.a crushed slag).

Per the requirements of the CD, the sale of materials off-site must be approved by the U.S. EPA. Specifically, the receiving facility must submit a 'Certificate of Recycling' and the Estate must submit a Purchase Contract for each product stream to the U.S. EPA for review and approval.

The U.S. EPA is in receipt of the required documents. U.S. EPA has also received additional documents to help support this sale. We find the Northeast Yejin Co., Ltd facility in Liyu Jiang Town, Chenzhou City of Hunan Province to be acceptable. Please arrange for and ship the 'Mixed Copper Tin Material' to this facility at your earliest convenience.

As noted in your submitted Purchase Contract, the receiving facility will be performing the assays of the material once received. Please submit to the U.S. EPA in electronic format all analytical or assays performed on this material.

Subject: CMAC and Interco Amendments

Kevin:

I am following up on your discussions with Dan Nester and Steve Zuber as well as the emails I sent you last week regarding approval of the CMAC and Interco Agreement Amendments. We have containers scheduled to begin delivery between January 24 and January 28 and were hoping to have the approval before then.

Please let me know if we can provide you with any additional information.

Thanks you for your time and consideration,

Scott
